A Little About Us

Our sole mission is to be our client's trusted global technical partner by supporting their mission critical facilities through exceptional levels of service and quality.

We have a proven track record that was built on a strategic growth plan focused entirely on being able to service our clients seamlessly regardless of project size or location.

While we continue to be the largest third-party commissioning firm in the world, we are now able to expand our services within the mission critical space and offer an array of professional services all offered with the same level of dedication to client and quality.

Our Client Portfolio Includes:

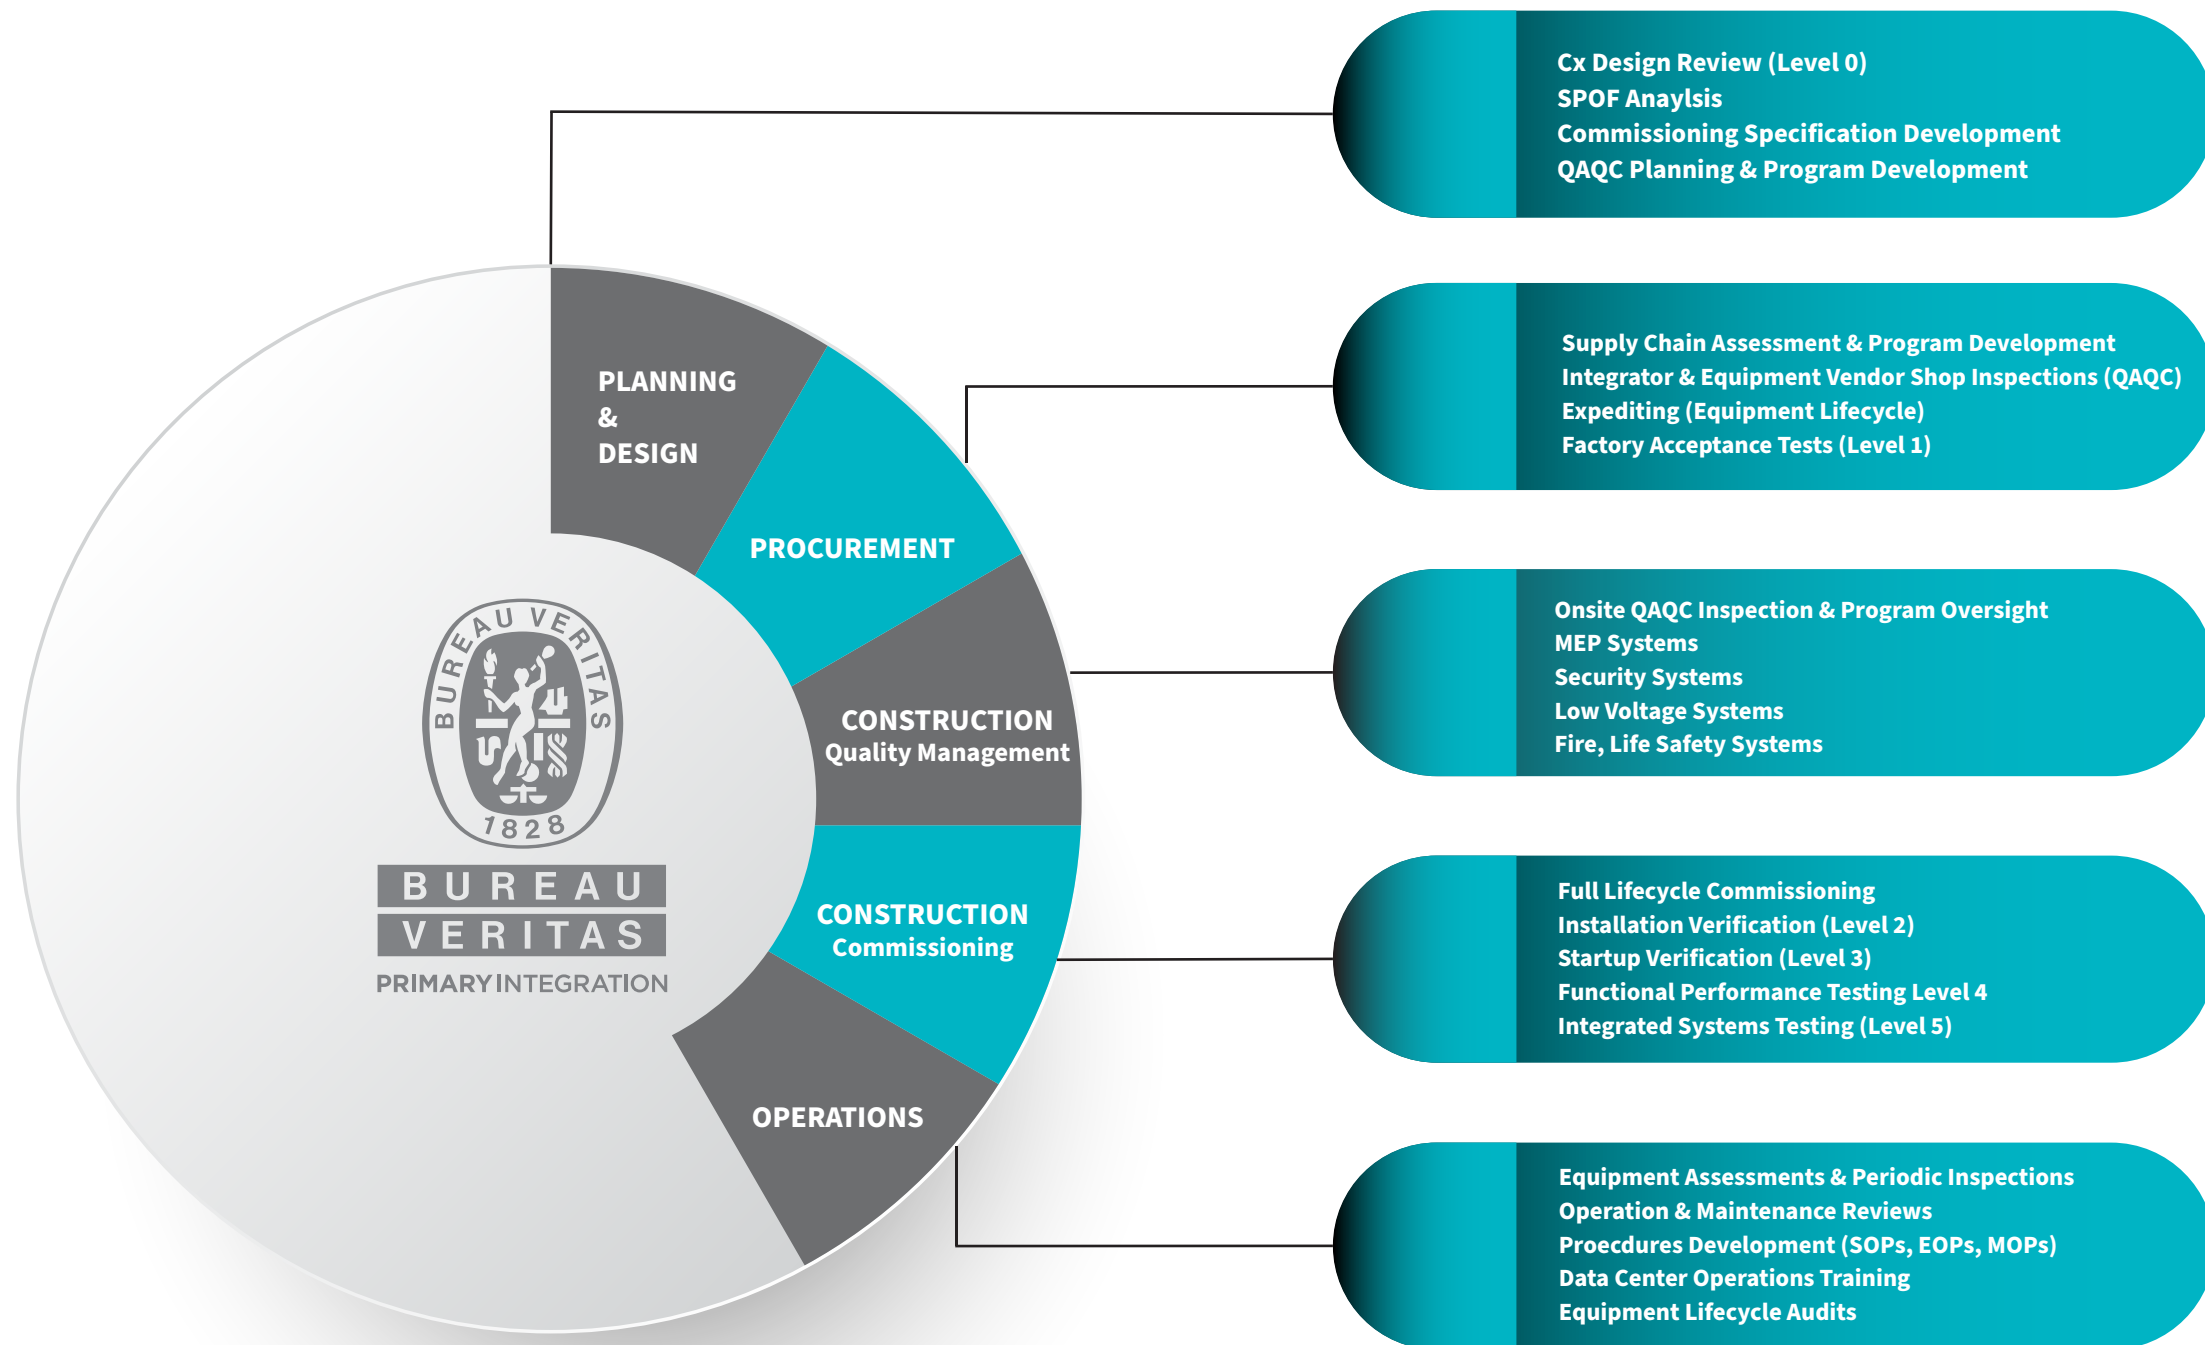

- Hyperscale Data Centers
- Colocation Companies
- Financial Companies
- Insurance Companies
- Technology Companies
- Telecommunications Companies
- Healthcare Facilities

CyrusOne Americas

BVPI has been a trusted partner to CyrusOne since 2010. We have commissioned well over 400MWs throughout the US.

Confidential Hyperscale Data Center, Global

BVPI provides commissioning and QA/QC services for this enterprise client worldwide. We have commissioned well over 1,000MWs in 5 countries. We were instrumental in helping design their specific commissioning program and continue to be their trusted technical partner.

Confidential Technology Company, Global

BVPI provided Cx Management, including procurement consulting and project expediting services for this client across nine countries in the APAC and EMEA regions. We successfully managed all external vendors ensuring equipment conformity and compliance verification. We implemented a standardized process across all nine projects resulting in an improvement in quality of deliverables and cost control for the client.

Vantage Data Centers, Global

BVPI has been providing commissioning services for Vantage since 2014. In that time, we have commissioned well over 300MWs throughout the Americas and Europe. Our successful partnership with Vantage has also provided us the opportunity to provide QA/QC services for them on several sites.

Confidential Hyperscale Data Center, Global

BVPI provides commissioning and QA/QC services for this large technology firm throughout North and South America. To date we have commissioned well over 200MWs and have provided QA/QC services at 4 project sites.

Confidential Colocation Services Provider, Global

BVPI provided site reliability and vulnerability assessment for this colocation provider throughout North America, Europe and Southeast Asia. Our expertise was sought out to assess the overall site engineering and design, modular deployments, facilities management processes and procedures and continuous training programs.
